

ComfortNet™

Wireless Home Comfort

COMMUNICATING CONTROL SYSTEM

ComfortNet™ Communicating Systems have RedLINK™ technology inside giving you endless possibilities for controlling and monitoring comfort inside your home with our lifestyle enhancements like the Portable Comfort Control, wireless indoor sensor, wireless outdoor air sensor, wireless humidity control and Total Connect Comfort Services.

Outstanding Features of the CTK03AA

- **Interview-based programming** — Your ComfortNet™ control asks you questions like “what time does the first person wake up in the morning?” and then programs itself based on your answers
- **On-screen HELP button** — The on-board user’s manual gives you definitions and directions for every screen to ensure you are comfortable in your decision making
- **Diagnostics and alerts** — With the engineered excellence of the ComfortNet Control System you can now be alerted when your system is not operating as expected giving you time to resolve the issue prior to a loss of heating or cooling
- **Precise temperature control** — ComfortNet Controls are tested to $\pm 1^{\circ}\text{F}$ for reliable, consistent comfort
- **Time-of-use scheduling** — Can automatically adjust your home’s temperature when utility prices are at their highest to help you save on energy costs
- **Service reminders** — Use your ComfortNet Control to remind you when it is time to change your filter and other services
- **Internet accessibility** — Allows monitoring and adjustment of your system over your PC, smart phone or tablet PC
- **Multi-lingual options** — Provides either English, Spanish or French menu languages

* To receive the 10-Year Control Limited Warranty, online registration must be completed within 60 days of installation and the unit must be installed in conjunction with a new, properly matched split system air conditioner, heat pump, or gas furnace containing a communicating system that is compatible with the control and is also registered within 60 days of installation. Online registration is not required in California or Quebec. Full warranty details available at www.goodmanmfg.com.

ComfortNet™ Wireless Home Comfort Control System

For Residential and Light Commercial Applications

Controls

A Wireless Indoor Air Sensor

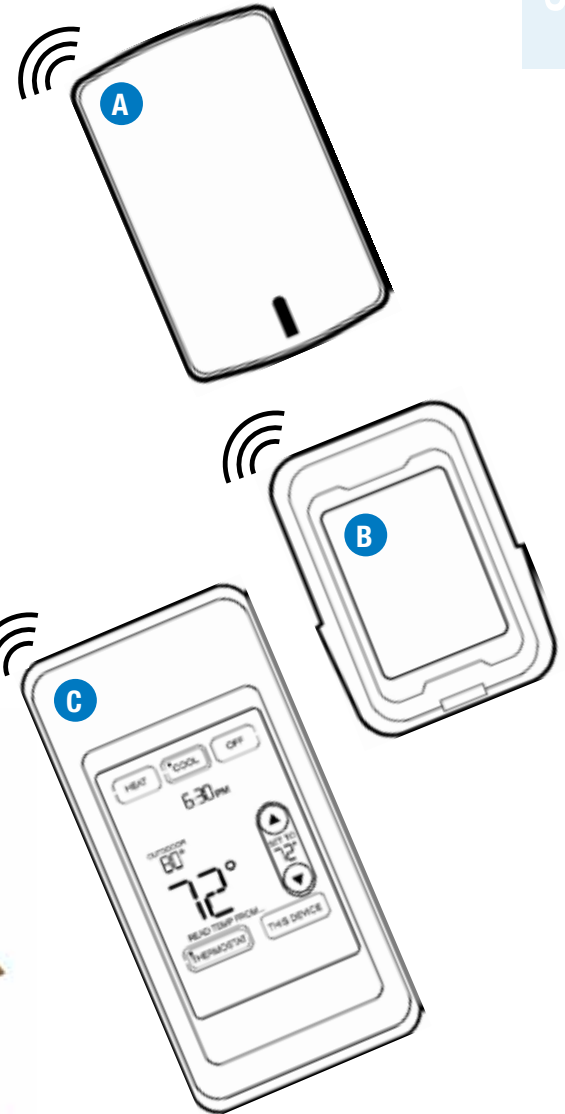

When paired with a properly matched ComfortNet Communicating Control, the Wireless Indoor Air Sensor(s) gives you the ability to change the sensing location of your thermostat, average temperature in large rooms for more even comfort control or monitor temperature and humidity in separate spaces to provide additional comfort or protection.

B Wireless Outdoor Air Sensor

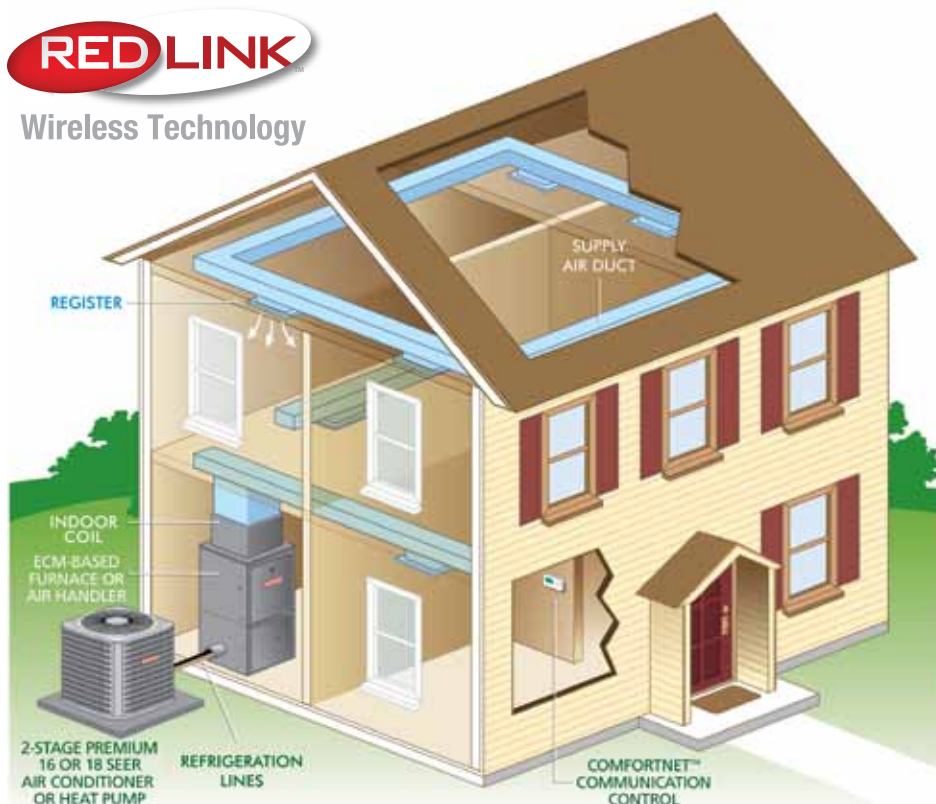

The Wireless Outdoor Air Sensor sends a signal to each RedLINK-enabled control, which displays both the outdoor temperature and the humidity right on the screen. Use this information to better prepare for your day and to make decisions about when to run your heating and cooling.

C Portable Comfort Control (PCC)

The PCC gives you the freedom to sense temperature and make adjustments from anywhere in your home. With zoning, the Portable Comfort Control can be used to change the set temperature in any zone from anywhere.

Wireless Technology

*Complete warranty details are available from your local dealer or at www.goodmanmfg.com. To receive the 10-Year Control Limited Warranty, the control must be installed in conjunction with a new furnace or air handler containing a communicating system that is compatible with the control and, if that furnace/air handler is a Goodman® brand unit, that furnace/air handler must have been registered online within 60 days of installation of the furnace/air handler. Failure by Quebec or California residents to have registered a Goodman® brand furnace/air handler does not diminish their warranty rights.
