Forsaire

WILLIAMS

Counterflow Furnaces

40,000 - 62,500 Btu/hr.

Top-Vent Counterflow

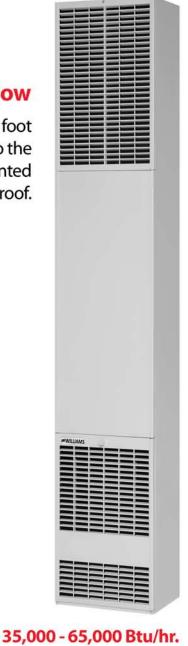

Models require less than one square foot of floor space. They may be recessed into the stud space or surface mounted and vented vertically through the ceiling and roof.

Direct-Vent Counterflow

The forced-air circulation comfort heating system uses only outside air for combustion, as the burners are completely sealed within the combustion chamber. Combustion products are discharged outdoors through the wall vent. This eliminates the expense of a vent. All vent caps include a built-in "Bird Guard". All vent material is included. Ideal for garages.

Design Features

- Freestanding or recessed, Forsaire furnaces are ideal for homes, apartments, offices, schools, cabins and many other applications.
- Counterflow blower system circulates ceilingto-floor warm air
- "Matchless" pilot igniter
- Multi-room heating with optional outlet accessories to heat up to three rooms
- Equipped with a four-foot service cord
- Natural or propane models (conversion kits available)
- Automatic temperature and safety controls
- Resettable vent-limit safety switch (top-vent models)
- Thermostat included

Features

6008832

"Matchless" Pilot Igniter

6008831

All models include a "matchless" pilot igniter. Assures convenient pilot lighting without matches.

Automatic Thermostat

All models are equipped with a 24V control valve and thermostat.

60,000

49,200

82.0

Contemporary Finish

Soft-white, powdered-coated, high-heat resistant finish to complement any décor.

Dimensions and Clearances

Top-Vent

- 4" to an intersecting wall.
- 4" from the top of the furnace to the ceiling or overhang.
- 2" from the top of the furnace to the ceiling or overhang on 60085 Series.
- 0" to finished floor.

Direct-Vent

- · 4" to an intersecting wall.
- 4" from the top of the furnace to the ceiling or overhang.
- 0" to finished floor.
- 59" from the finished floor to the centerline of the vent cap for Model Series 40073 and 40077.
- 681/2" from the finished floor to the centerline of the vent cap for Model Series 55073 and 62577.

Accessories

101/4"

Rear and Side Outlet Accessories

141/8"

Allows heat to be ducted into a rear or side room.

Model 6801 Rear-Outlet Register with 10" Boot for Top-Vent Models. Model 6802 Rear-Outlet Register with 1" Boot for Top-Vent Models.

Model 6701 Side-Outlet Register with 10" Boot for Top-Vent and Direct-Vent Models.

440

Standing

Model 6702 Side-Outlet Grille for Top-Vent and Direct-Vent Models.

Front Diffusing Grilles

A snap-on grille used to divert heat to the right, left or in both directions.

Model 6703 Two-Way Directional Diffuser Grille for All Models.

Model 6704 One-Way Directional Diffuser Grille for All Models.

Venting Accessories

Model 4318 Vent Shield Deflector - Insulated, galvanized metal sheet for Direct-Vent Models.

Model 9307 Thin Wall Collar - Wall thicknesses from 1 to 5". Used with Direct-Vent Models.

Model 9308 Vent Cap Guard - Protects pedestrian traffic from the heat of the vent cap.

Model 9806 Direct-Vent Tube Extension - 12" Length

Model 9901 Top-Vent Starter Kit - Contains starter hold down plate, oval-to-round adapter, two spacer plates and two pieces of oval pipe.

Model 9902 Vent Adapter for top-vent, freestanding (not recessed) installations.

Trim Strip Accessory

Model 4701 Metal finishing strips painted the same color as the furnace for all models.

Top-Vent Enclosures

Used for freestanding installations. Includes two side rails and a metal cover painted soft-white to match the furnace.

Model 9812 12" - Length

Model 9824 24" - Length

Model 9836 36" - Length

Hardwired Adapter

Model 9940 Used for wiring from a junction box rather than using the power service cord.
