## Heated Water Expansion Chart

Expansion tanks provide an air cushion into which the boiler water can expand when boiler water is heated.
Based upon an initial water temperature of $40^{\circ} \mathrm{F}$

| Water Temperature | Expansion of Water | Net Expansion-For <br> Tank Sizing <br> Purposes* |
| :---: | :---: | :---: |
| $100^{\circ}$ | $0.75 \%$ | $0.50 \%$ |
| $112^{\circ}$ | $1.00 \%$ | $0.67 \%$ |
| $125^{\circ}$ | $1.25 \%$ | $1.00 \%$ |
| $137^{\circ}$ | $1.75 \%$ | $1.38 \%$ |
| $150^{\circ}$ | $2.00 \%$ | $1.75 \%$ |
| $162^{\circ}$ | $2.50 \%$ | $2.25 \%$ |
| $180^{\circ}$ | $3.00 \%$ | $2.75 \%$ |
| $187^{\circ}$ | $3.38 \%$ | $3.12 \%$ |
| $200^{\circ}$ | $3.75 \%$ | $3.50 \%$ |
| $212^{\circ}$ | $4.25 \%$ | $4.00 \%$ |
| $225^{\circ}$ | $4.75 \%$ | $4.50 \%$ |
| $237^{\circ}$ | $5.38 \%$ | $5.00 \%$ |
| $250^{\circ}$ | $5.67 \%$ | $5.50 \%$ |

*"Net Expansion" takes into consideration the expansion of water and components in the system.
For example, if your system holds 50 gallons of water at the initial temperature of $40^{\circ} \mathrm{F}$, at normal operating temperature of $180^{\circ} \mathrm{F}$ the volume of water would have increased $3.0 \%$ to 51.5 gallons. Taking into account the expansion of the boiler water and system components, an expansion tank capable of handling that 1.5 gallon volume increase would be needed as a minimum.

## Types of Expansion Tanks:

Plain steel with no rubber bladder, which must be drained from time-to-time if system pressures exceed 24 psig. This is due to the air in the tank dissolving into the boiler water and being vented from the system.

Bladder-type tanks (which cannot be drained and in most cases should maintain an operating pressure of 12 psig ) If this type of tank is hooked to the a filltrol-type fill valve, the air pressure in the tank determines the fill pressure (minimum system pressure) Adjusting air pressure on a tank hooked to a filltrol fill valve is the way minimum system pressure is adjusted: 0 psi air pressure $=0$ psi minimum system pressure.
