COMFORT WHERE YOU WANT IT

Delivering the right level of warmth and cooling to the spaces you choose, saving energy and money

Personal comfort in a home or business shouldn't be a struggle. But individual preferences, time of day, and building design contribute to the difficulty in maintaining comfort throughout.

ZonePak is the smart solution for delivering controlled comfort throughout your environment. Its unique, air-driven damper system is guided by multiple independent, pre-programmed thermostats, creating up to three separate zones of unparalleled comfort while utilizing a single air handler. The select delivery of conditioned air satisfies thermostat needs quickly, allowing the air handler to run more efficiently and reducing overall energy consumption and costs.

Comfort where you want it, when you need it

Comfort made easy

ZonePak's convenient, complete-packaged system is easily integrated into existing SpacePak ductwork or new installations, and is backed by unmatched factory support. Its pre-programmed controls make it simple to deliver the right amount of heating or cooling to selected zones.

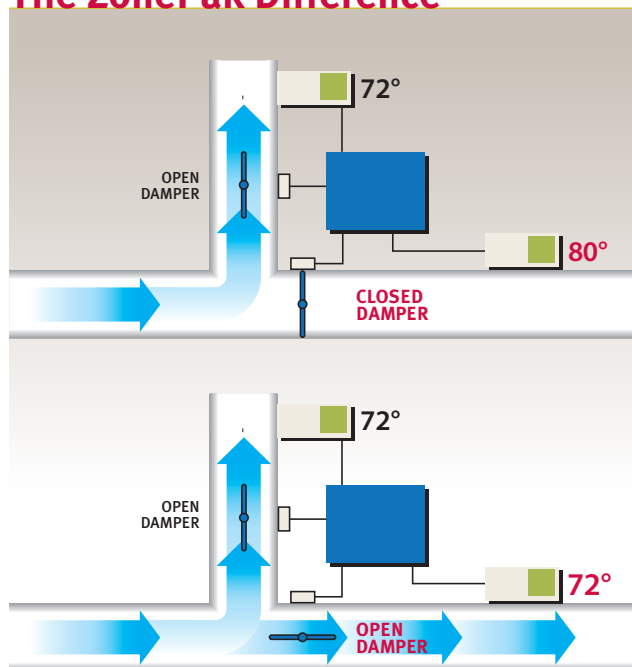

A good fit for any structure

ZonePak's applications extend to almost any structure: multi-family or multi-floor dwellings, commercial or retail developments, retrofits or new constructions can all benefit from its unique, energy-efficient technology.

ZonePak provides comfort to the space you choose, including individual rooms, suites, or entire floors.

The ZonePak Difference

ZonePak's control panel interacts with up to three different thermostats to direct conditioned air from the air handler to whichever zone needs it. The use of branch dampers, with or without plenum dampers, offers even more flexibility.

The efficient solution to personal comfort

Everything from the time of year to the time of day can affect your personal comfort at the home or office. Inefficient delivery systems using only one thermostat to control all heating and cooling (including in unused spaces) results in higher energy consumption and cost.

ZonePak takes the challenge out of keeping your environment uniformly comfortable without wasting energy.

ZonePak benefits

- Easy-to-install vinyl tubing
- Simple 24-volt wiring
- Quiet operation
- Pre-programmed controls
- Unmatched factory support
