

CAPT, CAPF, CHPF, CAUF and CSCF
EVAPORATOR COILS

ENHANCED PERFORMANCE

Thank goodness
for Goodman.®

At Goodman, we believe in American dependability. Units are designed, engineered and assembled in the U.S.A.

Independent, dependable, courteous, prompt, honest, highly-skilled and respectful of you and your home. That's why all the time homeowners say,

"These guys are good – really good."

Why does Goodman® have such a large fan base?

Many of your neighbors may have discovered that a reliable and energy-efficient home comfort system doesn't have to cost a fortune. Goodman brand whole-house systems feature many of the latest and greatest money-saving technology benefits that we can offer. They are designed and engineered to run quietly and pretty much worry-free.

Goodman® is one of the biggest names in home heating, cooling and energy-efficient home comfort. That's because Goodman lives up to its name in a big way, with time-tested energy-efficient technology, highly-durable materials and spot-on manufacturing. So, no matter where you live or whether your home is small or large, Goodman probably has a solution to help keep your home comfortable.

Using Goodman is a breeze. Love is in the air.

The best indoor comfort system is the kind you don't have to think or worry about. It comes on the moment you need it and then runs quietly and efficiently year after year. Goodman air handlers and coils have features designed to provide outstanding performance. We use advanced techniques and materials so you know the cozy, even temperature you feel in every corner of your home is an energy-efficient trend you'll love for many years.

Home comfort that won't blow your budget.

Our complete line of air handlers and coils are priced reasonably and affordably from your local independent dealer. And that's only the beginning. We want you to smile every time you open your utility bill, so we design into our units proven efficient technology.

Taking pride in our company heritage.

Goodman brand heating and cooling systems are designed to provide refreshingly affordable and energy-efficient indoor comfort solutions using advanced technology. But the company ultimately adheres to some old-fashioned values, too. Goodman believes in the integrity of the American worker. That's why Goodman brand heating and cooling systems are designed, engineered and assembled in the United States.

Experience reliable indoor comfort for everyone
in your home year after year after year.

A LOT GOES INTO EVERY GOODMAN® BRAND CAPT, CAPF, CAUF, CHPF, CAUF and CSCF ALL-ALUMINUM EVAPORATOR COIL

The art of precision

Aluminum Tube and Aluminum Fin Coil Construction – Provides time-tested and proven heat transfer efficiency designed to resist potential corrosion.

Grooved Aluminum Tubing – Offers increased surface area for efficient heat transfer performance by the unit’s refrigerant.

Goodman evaporator coils simply work the way they’re supposed to, making each one a thing of beauty.

Every Unit Is Helium Pressure-Tested – During assembly to help ensure high levels of product quality. Helium is used, in part, because its molecules are smaller than oxygen. It’s just one extra step taken to help ensure a high quality product.

Every All-Aluminum Coil – Receives finished pressure testing and leak ‘sniffing’ by ‘hound-dog’ vacuum testing. This is a secondary test every unit receives before it leaves the factory.

A TIME-TESTED SINGLE METAL SOLUTION

The All-Aluminum evaporator coil is constructed from aluminum tubing, fins and end plates giving you a single metal solution for outstanding, time-tested, heat transfer performance properties. If you’re looking for an evaporator coil that offers enhanced durability, coupled with enhanced performance (as tested in our labs), this is the product for you.
