

# TempZone™ Electric Floor Heating

**TempZone™ cut and turn technology for full coverage.** The evenly spaced, 2" serpentine loop design delivers more heating capacity and faster floor warm-ups than most competitive systems. Less than 1/8" thick, it installs easily under tile, stone, and marble flooring.

**ValueMats™ for economy coverage.** Utilizing the same TempZone™ technology but designed to warm just the most utilized area in front of the bathroom vanity or the entryway foyer. ValueMat™ is a cost conscious way to warm up naturally cold tile and stone, making it perfect for bathrooms, kitchens, and foyers.
