Large 24" x 36"

Under Desk Heater Keeps You Warm at Work

Personal Warming Solution

The WarmlyYours Under Desk Heater is a very stylish solution to an age old problem – It's just too cold at your desk. This plug-in floor mat is designed to fit conveniently under any desk, providing extra warmth and comfort, when and where you need it.

Energy Saving

A WarmlyYours Under Desk Heater provides the same level of comfort and warmth as a standard space heater at a fraction of the energy use. A typical convection space heater can consume up to 1500 watts per hour, while an Under Desk Heater uses less than 120 watts. This energy efficient design, utilizing radiant heating technology, keeps you warm and comfortable while lowering your energy costs.

High Corporate Acceptance

Conventional space heaters can overload electrical circuits, leading to a reduction in office productivity. Space heaters also blow much of their heat into the surrounding area, which can activate the air conditioning system, making the room even cooler. A WarmlyYours Desk Heater is designed to warm only the employee's personal environment. This energy efficient approach creates a personal comfort zone for each employee without disrupting the general office environment. Under Desk Heaters provide a method for employees to control their comfort which boosts productivity. The WarmlyYours Under Desk Heater keeps everyone happy, including the boss.

Feel the Radiant Heat and Softness

WarmlyYours sourced a carpet covering so incredibly soft, you will appreciate your Desk Heater just for the way it feels. Not only will the Heater deliver soothing radiant warmth directly to your feet, legs and lower body, it will provide a soft place to rest your tired feet and sooth away the stress of the workday.

Easily Accessible Control

WarmlyYours Under Desk Heater has a convenient ON/OFF control switch. Upon turning the unit ON, your Heater will become comfortably warm within minutes. The ON/OFF switch is located approximately one foot away from the edge of the mat making it easily accessible and allows you to turn your Heater "on" and "off" effortlessly.

Colors and Sizes for any Desk Space

WarmlyYours offers two sizes of the Under Desk Heater to accommodate any desk size.

Small - 18" x 24". Setting: ON-60 watts

Large - 24" x 36". Setting: ON-120 watts
