TempZone ValueMat™ Floor Heating

Luxury Designed to Fit Your Budget

Sometimes, designing floor heating coverage for the entire footprint of your room may not always be the best option. WarmlyYours ValueMat™ is an economical solution that allows you to enjoy the luxury of floor heating while also staying within your budget. ValueMats™ utilize the same industry leading technology as WarmlyYours TempZone™ rolls but are designed to warm just the most utilized areas in a room, like the “standing area” in front of the bathroom vanity. The ValueMat™ is a cost conscious way to warm up naturally cold tile and stone, making it perfect for bathrooms, kitchens, and foyers. Energy efficient and maintenance free, ValueMats™ cost only pennies a day to operate, but give you the same comfort and warmth as our TempZone™ rolls. You'll enjoy the benefits of radiant floor heating for less.

Value Coverage Provides Targeted Coverage

The unique design of a ValueMat™ allows you to reduce floor heating coverage to a selected area or areas of your room's footprint that are utilized the most. You will have the benefit of a blanket of warmth – a warm zone - beneath your feet in the areas where you walk or stand most often.

Easy to Install – No Cutting & Turning Required

The ValueMat™ is a pre-cut mat for your project. It requires no cutting & turning like traditional TempZone™ rolls, reducing risk of installation error. There is just a single mat to install to create a warm zone in your room. Installed along with your flooring, this ultra thin “stay flat” fiberglass mesh mat measures 1/8” thick and protects the heating cable against trowel nicks allowing for quick and easy installation by the DIY homeowner or floor covering specialist. Keep in mind when planning your project, more than one ValueMat™ can easily share a single control.

Six Mat Sizes to Choose From

TempZone ValueMats™ come in six mat sizes which are perfect for warming select areas of your room. The smaller mats are perfect for the bathroom, and are especially well suited for installation in front of the toilet, tub, vanity, and shower. The larger sizes are ideal for large open areas in bathrooms, kitchens, and foyers.

FLOOR PLAN

TempZone ValueMat™ (for Tile and Stone floor warming applications)

ITEM NUMBER	DESCRIPTION	HEATED AREA	WATTAGE	AMPERAGE	AREA
HM-120-0302	3' x 2' Heated Mat 120V	6 square foot	90	0.75	toilet area
